CASE STUDY • CVM STRATEGY

BrightTV Viewership Insights & Growth Plan

Turning 10,989 viewing sessions into a CVM playbook

AT A GLANCE

5,375
Unique viewers analysed

10,989
Viewing sessions

1,523 hrs
Total watch time

8.3 min
Average session length

Agenda

What we will cover in the next 20 minutes

- **1. The brief**

  CEO objective and what success looks like
- **2. Who is watching**

  Demographic and geographic profile
- **3. How they watch**

  Channels, dayparts, session length
- **4. What drives consumption**

  Key behavioural and content factors
- **5. Filling the low-consumption gap**

  Content recommendations
- **6. Growing the user base**

  CVM initiatives and next steps

The brief

CEO objective

Grow BrightTV's subscription base for the current financial year by giving the CVM team data-led insights into how subscribers actually watch.

Our four questions

- Insights on user and usage trends
- Factors that influence consumption
- Content to lift low-consumption days
- Initiatives to grow the user base

DATASET

BrightTV viewing log

10,989 sessions
across Jan–Mar 2016

5,375 unique users
920 anonymous, 4,455 with profile

30+ channels
from sport to kids to news

9 provinces
national footprint, Gauteng-led

UTC timestamps
converted to SA local time

Headline numbers

What the dataset tells us in one glance

5,375
Unique viewers in the period

10,989
Total viewing sessions logged

1,523h
Cumulative watch time

8.3 min
Average session length

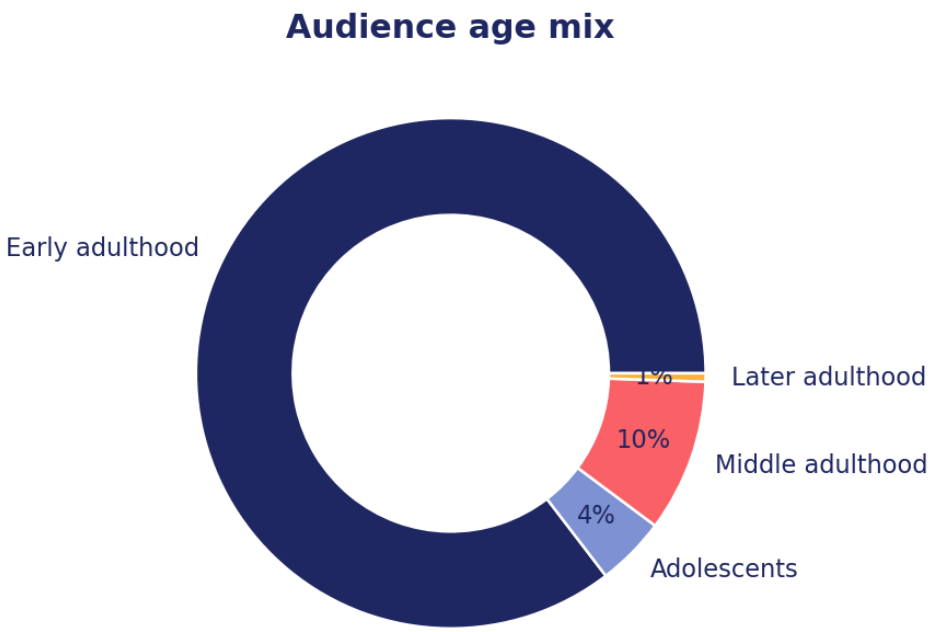
70%
Sessions in Gauteng + Western Cape + KZN

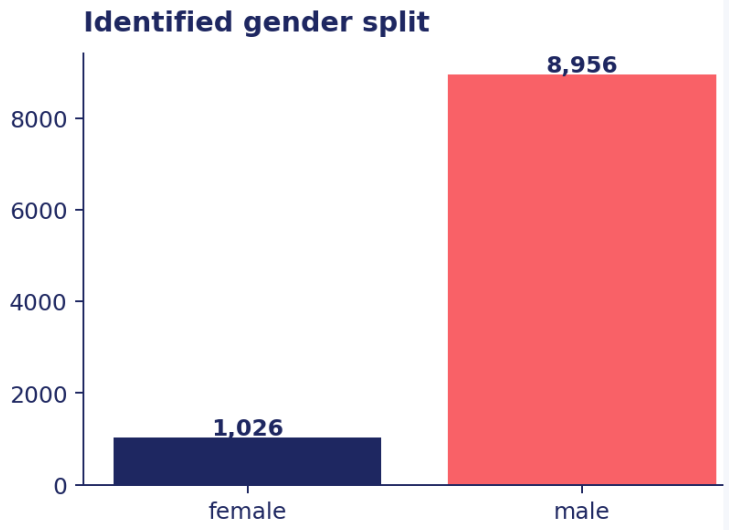
86%
Identified viewers in Early adulthood (20–39)

Insight: Audience is concentrated, young and urban — but average session length is still under 10 minutes. The opportunity is depth of engagement, not just reach.

Who is watching

A young, mostly male, urban audience — with rich diversity



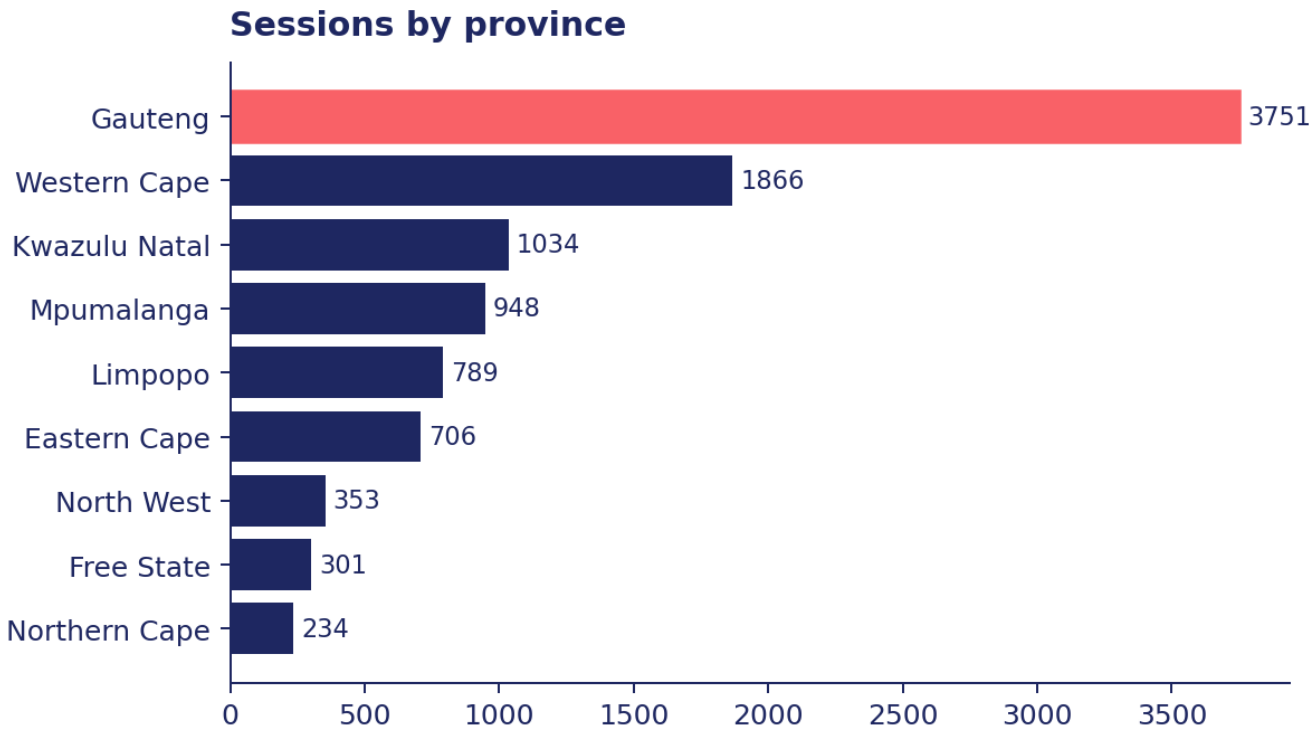


Key takeaways

- Early adulthood (20-39) drives 86% of identified viewers
- Identified viewers skew male (~90%) — likely sport-led mix
- Black, coloured and indian/asian viewers together = 87% of identified base
- ~17% of users are anonymous — sign-up friction or lapsed profiles

Where they watch

Three provinces deliver two-thirds of all viewing



GEO INSIGHTS

Concentrated, not national

Gauteng leads
3,751 sessions — 34% of all viewing

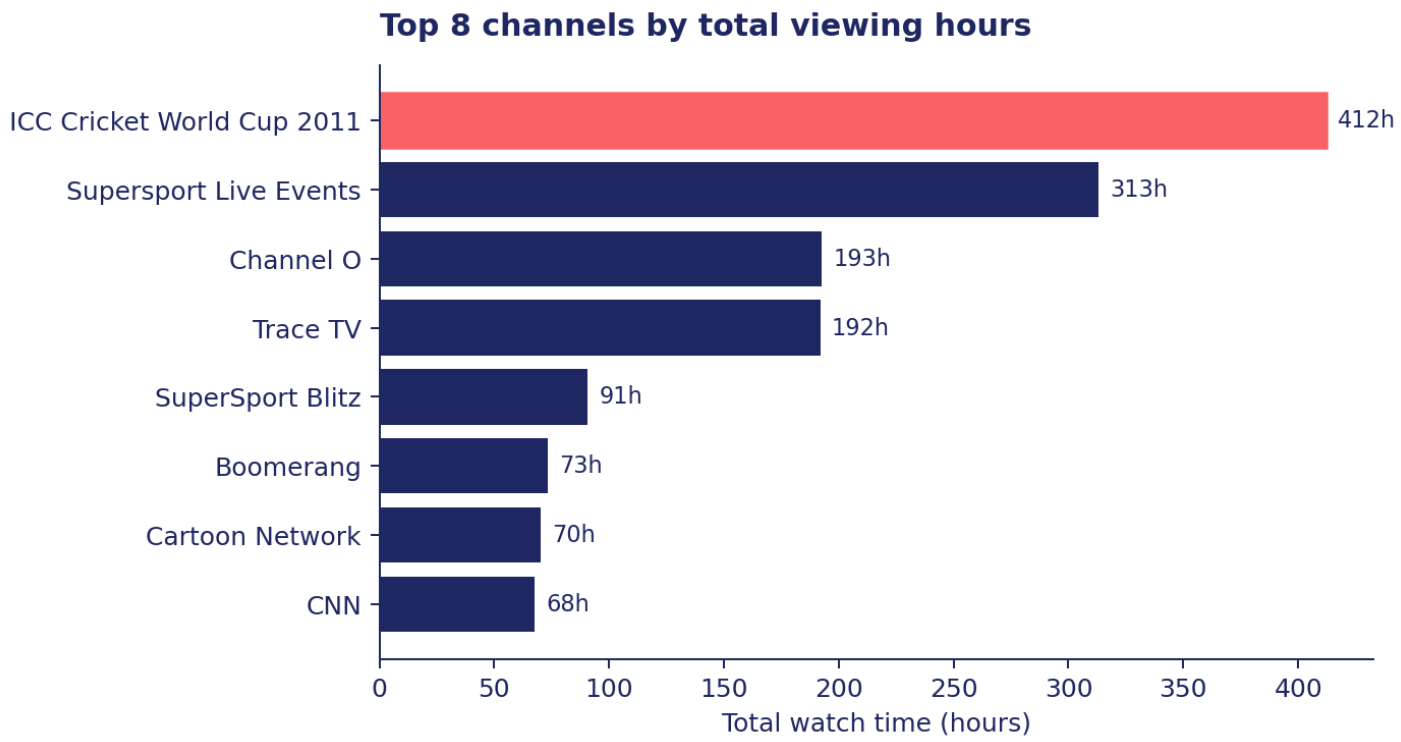
WC + KZN follow
together another 26% of sessions

Limpopo, EC, NW, FS, NC
tail provinces — under-served and worth targeting

Action
Tailor acquisition spend to top-3 provinces; pilot regional content for the tail

What they watch

Sport dominates — kids and music carry the long tail



Genre signal

Sport = #1
Cricket WC, SuperSport Live & Blitz combine for ~55% of total hours

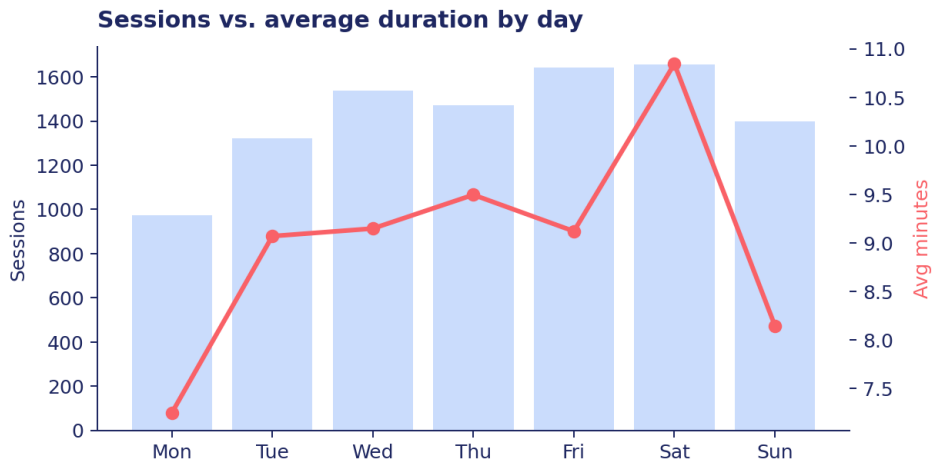
Music & lifestyle
Channel O and Trace TV drive sustained mid-length sessions (~11 min)

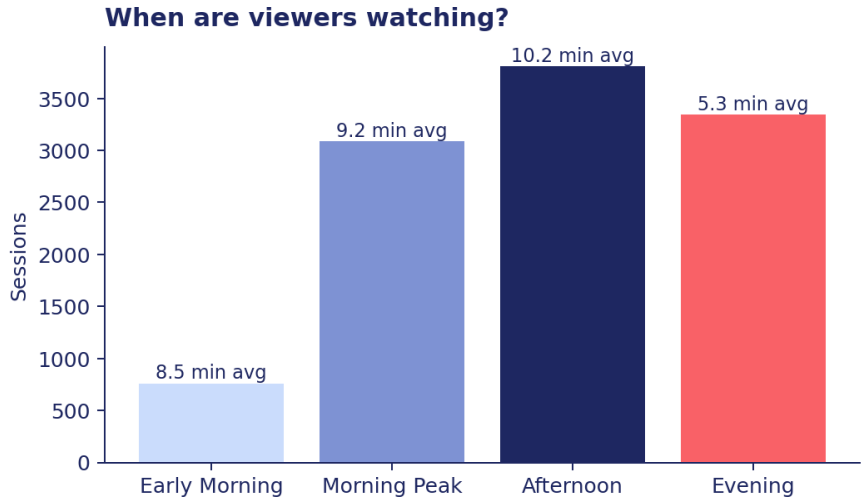
Kids
Cartoon Network + Boomerang have high session counts but short durations

News
CNN delivers quality, low-volume engagement

When they watch

Saturday afternoons are gold — Mondays are the soft spot





TIMING INSIGHTS

Weekend lift
Saturday delivers the longest sessions (10.8 min avg) and the most sessions

Monday slump
Lowest sessions (974) and shortest avg duration (7.2 min) — clear fix opportunity

Afternoon wins on length
10.2 min avg vs 5.3 min in the evening

Evening = volume, not depth
3,341 sessions but very short — likely browsing without commitment

What drives consumption

Five factors stand out across the dataset

Live sport tentpoles

ICC Cricket WC and SuperSport Live alone account for 725 of 1,523 viewing hours

Day of week

Sat sessions are 70% longer on average than Mon sessions

Time of day

Afternoons drive 2× the avg session length of evenings

Demographics

Early-adulthood males in Gauteng over-index on every metric

Profile completeness

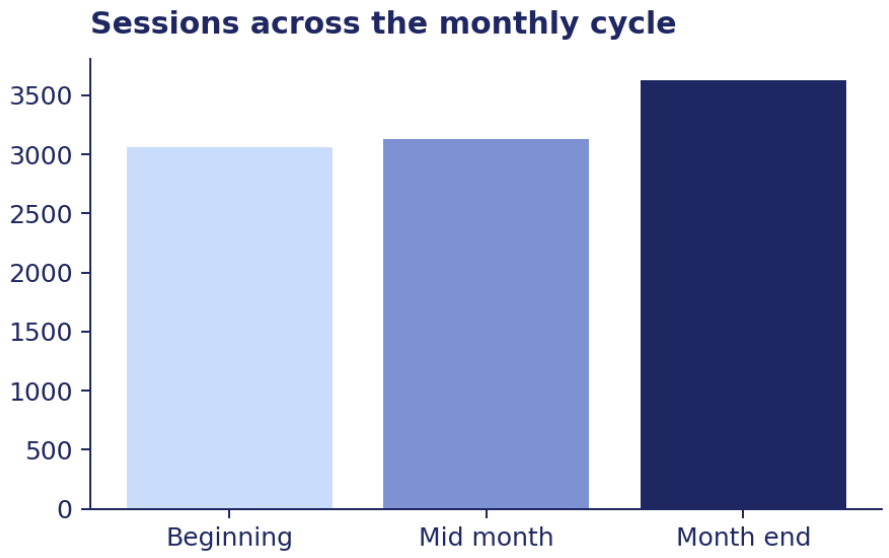
Anonymous users average shorter sessions and never receive CVM nudges

Monthly cycle

Month-end weeks generate 3,627 sessions vs 3,063 at the beginning

Lifting the low days

Targeted programming for Mondays, Sundays and weekday evenings



Where the gap shows up

Mondays & beginning-of-month deliver ~16% fewer sessions than month-end peaks.

Content recommendations

- **Monday Night Live**
  Original talk, comedy or sport panel show building on weekend results to pull the Saturday audience back
- **Premiere Sundays**
  Anchor first-run drama or movie premieres to Sundays to lift the soft 8.1-min average
- **Kids After-School block**
  3–5pm cartoon stack on weekdays; co-view with parent recommendations for evenings
- **Weekday Sport Highlights**
  15-min compressed match recaps to convert short evening sessions into longer engagement
- **Music Discovery hour**
  Channel O / Trace curated takeover Mon–Wed evenings to defend the music vertical

Initiatives to grow the user base

A CVM playbook across acquisition, activation and retention

ACQUIRE

Sport-led campaigns
Lean into ICC & SuperSport audiences with referral codes

Province expansion
Targeted media buys in Limpopo, EC and NW

Female audience push
Lifestyle, drama and music bundles to rebalance the 90/10 male skew

ACTIVATE

Profile completion
In-app prompts to convert 920 anonymous viewers into known users

Personalised onboarding
First 7-day playlist based on first channel watched

Welcome series
3 emails / push messages mapped to viewer's segment

RETAIN

Monday re-engagement
Push notification linked to Monday Night Live

Lapse trigger
Re-engage after 5 days of no sessions with personalised picks

Loyalty perks
Early access to live sport for users with 4+ sessions / week

From insight to action

Audience

Young, urban, male-skewed sport fans — with clear under-served segments to unlock

Content

Sport drives depth; Mondays, Sundays and evenings need original, scheduled programming

CVM

Convert anonymous viewers, expand to tail provinces, and personalise around the weekly cycle
